

## Rotary International

### Technology Task Force

**Mission:** Strengthen Rotary's ability to serve communities and the world by improving communications and training through the use of available technology.

Date: 28 July 2000

To: District Governors  
District Internet Communications Officers  
District Task Force Coordinators

CC: Technology Task Force members

From: Tom Todd, Chair Technology Task Force

As you already know, Technology is always changing. And as you and I work together to "CREATE AWARENESS and TAKE ACTION", we too must be ready to change, adapt and modify to insure that we do the very best job possible this year to achieve our goals. Much of what we have put in place is working very well and you are to be commended for your support of this effort and your work to date to accomplish our goals.

We now want to add what we consider to be a very important component to our team structure: A NEW CLUB INTERNET COMMUNICATIONS OFFICER to be appointed by the Club President. Please note the related document, "Role of the Club Internet Communications Officer" for information on the responsibilities we would like this individual to assume.

President Devlyn is encouraging all of Rotary to make full use of Email and the Internet as good resource and communication tools for Rotary this year. He is convinced Rotarians, Districts and Clubs can communicate more effectively and be better informed by use of these Technology tools. He asks that we TAKE ACTION now to have clubs name these new CLUB INTERNET COMMUNICATIONS OFFICERS. Please note it is required that these Officers have Email and are able to access the Internet.

Just as important, as soon as they are named, please encourage them to register in their new job role at: <http://www.rotary.org/admin/email/index.htm> so their Email address will be part of our Key Leadership records.
