**The Four-Way Test:**

- **Is it the truth?**
- **Is it fair to all concerned?**
- **Will it build goodwill and better friendships?**
- **Will it be beneficial to all concerned?**

**Question of The Week:**

*Club President Ray Knowis asked the club to ponder the following question that was asked last week. A discussion will insue this week!*

*What can a 5<sup>th</sup> grader buy with only 43 cents?*

*(Specifically one quarter, one dime, one nickel, and three pennies.)*

**Bonus Question:**

*--What Rotarian would you expect to be involved in this question?—*

*The following quotes are dedicated to Jim Devlin in regards to his vast technological expertise:*

"I've come up with a set of rules that describe our reactions to technologies. Anything that is in the world when you're born is normal and ordinary and is just part of the way the world works. Anything that's invented between when you're fifteen and thirty five is new and exciting and revolutionary and you can probably get a career in it. Anything invented after you're thirty-five is against the natural order of things."

*---Daveman Deluxe*

"The most overlooked advantage of owning a computer is that if they foul up there's no law against whacking them around a bit."

*---Eric Porterfield.*
