Blood Assurance is in critical need of O negative blood donations. The regional blood center currently has less than one day’s supply of O negative

blood.

Approximately 4 percent of the population has O negative blood, which is commonly referred to as the universal type of blood. It is used in emergency situations when the patient's blood type is unknown.

Donors are urged to visit any location of Blood Assurance or donate at one of the bloodmobiles in the community. Tullahoma's location is behind the Radio Shack store.
